

DOMINO DASH

NUMBER SENSE

OBJECTIVE: Students will locate dominos that have equivalent number of dots.

SUPPLIES:

- ◆ 24 dominos

APPROXIMATE TIME: 10 minutes

NUMBER OF PLAYERS: 2 to 4

TEACHING TIPS:

Players will place dominos in center of playing area, dot side up. Each player will draw a domino and count the number of dots on his/her domino. If a player discovers that they have the same amount of dots as another player, they may choose to pick a new domino. Players will then look for other dominos that have the equivalent/same amount of dots as their first domino.

Players needing a little more challenge can find dominos with one more dot than the one they drew or one less dot.

At first, some players may just be able to spot dominos that have dots exactly like the dots on their domino. With repetitive play, however, they will move up to locating dominos with equivalent values.

These dominos both have 5 dots.
